are encouraged to engage the appropriate type of expert to investigate.

- The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- The appraiser may have provided a sketch in the appraisal report to show approximate dimensions of the improvements, and any such sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size. Unless otherwise indicated, a Land Survey
- If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no quarantees, express or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made
- If the cost approach is included in this appraisal, the appraiser has estimated the value of the land in the cost approach at its highest and best use, and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used. Unless otherwise specifically indicated, the cost approach value is not an insurance value, and should not be used as such.
- The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of
- The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.
- If this appraisal is indicated as subject to satisfactory completion, repairs, or alterations, the appraiser has based his or her appraisal report and valuation conclusion on the assumption that completion of the improvements will be performed in a workmanlike manner.
- An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment
- The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database.
- An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser performs a non-invasive visual inventory that is not intended to reveal defects or detrimental conditions that are not readily apparent. The presence of such conditions or defects could adversely affect the appraiser's opinion of value. Clients with concerns about such potential negative factors

The Scope of Work is the type and extent of research and analyses performed in an appraisal assignment that is required to produce credible assignment results, given the nature of the appraisal problem, the specific requirements of the intended user(s) and the intended use of the appraisal report. Reliance upon this report, regardless of how acquired, by any party or for any use, other than those specified in this report by

the Appraiser, is prohibited. The Opinion of Value that is the conclusion of this report is credible only within the context of the Scope of Work, Effective Date, the Date of Report, the Intended User(s), the Intended Use, the stated Assumptions and Limiting Conditions, any Hypothetical Conditions and/or Extraordinary Assumptions, and the Type of Value, as defined herein. This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the client to evaluate the property that is the subject of this appraisal for an opinion of market value only.

INTENDED USER: The intended user of this appraisal report is the client.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

#### COMMENTS ON PHOTOGRAPHS:

> THE PHOTOGRAPHS IN THIS REPORT ARE DIGITAL PHOTOS UTILIZING IMAGING TECHNOLOGY. THE APPRAISER HAS PERSONALLY INSPECTED AND PHOTOGRAPHED THE SUBJECT AND ALL COMPARABLES UTILIZED IN THIS REPORT; HOWEVER, SOME OF THE COMPARABLES MAY HAVE BEEN DOWNLOADED FROM AN ON-LINE PROVIDER OR MLS SERVICE, WHICH BETTER DEPICTS THE COMPARABLES AT THE TIME OF SALE. IN SOME SITUATIONS THE APPRAISER MAY NOT BE ABLE TO TAKE PHOTOGRAPHS OF COMPARABLES DUE TO PRIVACY RESTRICTIONS SUCH AS LONG DRIVEWAYS, WHEN THE COMPARABLE IS NOT VISIBLE FROM THE PUBLIC ROAD. ON-LINE PHOTOS MAY BE USED IF A COMPARABLE HAS BEEN RAZED FOR NEW CONSTRUCTION. ON-LINE PHOTOS MAY ACCOUNT FOR SEASONAL CHANGES IN THE PHOTOGRAPHS. THE PHOTOGRAPHS USED IN THE APPRAISAL ARE A TRUE AND CORRECT REPRESENTATION OF THE SUBJECT PROPERTY, AND THE COMPARABLE SALES USED IN THIS REPORT. ALTHOUGH THE PHOTOGRAPHS MAY HAVE BEEN ENHANCED DURING THE FINISHING PROCESS FOR BETTER QUALITY, NO ALTERATIONS WERE MADE TO THE IMAGES WHICH WOULD MISREPRESENT THE APPEARANCE OF THE SUBJECT OR COMPARABLES.

#### ADDITIONAL COMMENTS:

UNLESS OTHERWISE STATED IN THE APPRAISAL REPORT, THE APPRAISER HAS NO KNOWLEDGE OF ANY HIDDEN OR UNAPPARENT CONDITIONS OF THE PROPERTY THAT WOULD MAKE THE PROPERTY MORE OR LESS VALUABLE, AND MAKES NO GUARANTEES OR WARRANTIES, EXPRESS OR IMPLIED, REGARDING THE CONDITION OF THE PROPERTY, THE PURPOSE OF THIS APPRAISAL REPORT IS FOR AN OPINION OF MARKET VALUE ONLY.
